Experience

SmartBridge (Salesforce Partner) May 2025 – July 2025
Salesforce Developer Intern *Virtual*

- Developed backend logic and CRM customizations using Apex and Salesforce tools.
- Built responsive user interfaces using Lightning Web Components (LWC).
- Worked on data modeling, object relationships, security, and workflow automation in Salesforce.
- Earned Apex Specialist and Object Relationships Superbadges on Salesforce Trailhead.

Projects

Smart Contract Lifecycle Management System | *MongoDB, Express.js, React.js, Node.js, JWT* GitHub

- Developed a full-stack contract management platform using the MERN stack to streamline contract creation, approval, tracking, and lifecycle management.
- Implemented secure authentication and role-based authorization using JWT for Admin, Manager, and User access control.
- Designed RESTful APIs and integrated MongoDB for efficient storage and retrieval of contracts, notifications, and audit logs.
- Built dynamic dashboards, contract status tracking, and automated notifications to improve workflow transparency and document monitoring.

Requirement Change Impact Analysis Tool (RCIAT) | *Python, Streamlit, MongoDB, NetworkX, scikit-learn* GitHub

- Developed a requirements engineering platform that models requirement dependencies as directed graphs using NetworkX to analyze upstream and downstream change impact.
- Implemented an NLP-based impact detection module using TF-IDF vectorization and cosine similarity to identify textually related but unlinked requirements.
- Designed role-based access control for Admin, Business Analyst, Project Manager, and Developer/Tester roles with bcrypt-hashed authentication and MongoDB-backed session management.
- Built interactive dependency graph visualizations and reporting modules for traceability matrices, impact analysis, and requirement version history.

Smart Attendance System | *Python, Flask, OpenCV, MongoDB* GitHub

- Developed a facial recognition-based attendance system using OpenCV for real-time face detection and tracking.
- Built Flask backend services with MongoDB integration for secure attendance and user data management.
- Implemented image preprocessing and validation techniques to improve recognition accuracy and prevent proxy attendance.
- Designed an automated attendance management workflow with real-time record updates and reporting features.

Education

SRM University AP Aug. 2023 – Present
BTech Computer Science and Engineering (AI & ML) *CGPA: 8.30*

Certifications

Oracle Certified Professional (OCP): Java SE 17 Developer View Certificate

MongoDB Associate Developer View Certificate

SAP Certified: SAP Generative AI Developer View Certificate

Technical Skills

Programming Languages:C, C++,Python,Java
Web Development: HTML, CSS, JavaScript,React.js, Node.js, Express.js, REST APIs, JWT, bcrypt, Flask
Databases: MySQL, MongoDB
Developer Tools: Git, GitHub, VS Code, Postman
Core Concepts: Data Structures & Algorithms, OOPS, DBMS, Machine Learning,Generative AI
Enterprise Technologies: SAP ERP Concepts (MM, SD, PP), SAP S/4HANA
